

Dr (Davey) Han Dehui

As Head of China Operations of Brandwood Biomedical, Dr Han provides foreign companies effective regulatory, quality and distribution strategies for importing into, or manufacturing in China, and expertise for Chinese domestic manufacturers exporting to International markets.

Business Profile

Dr Han delivers significant positive outcomes to clients by bringing medical devices and IVDs to market via the most profitable safe regulatory pathway. This is achieved through his depth of knowledge of the China, Asian and international regulations, participation in framing China medical device legislation and comprehensive industry/government liaison at the highest levels.

With a background in medicine, he has worked both for the Chinese Ministry of Health and European and US multinationals, providing clients with a unique blend of technical and business expertise in the domestic China, regional Asian and international marketplace.

Professional Experience Summary

Dr Han has more than 25 years experience in the healthcare business. His outcomes have included leadership in product registration, clinical trials, quality management systems, post-market surveillance, industry organization and lobbying, government affairs, health policy and technical standards development.

The expertise Dr Han provides clients is derived from previous and current roles including:

- **Division Director**, Health Economics Institute, Chinese Ministry of Health
- **Deputy Director**, Government & Key Customer Relations Group
- **General Manager**, Regulatory Affairs and Quality Management for multinational corporations
- **Co-Chair**, Medical Device Working Group, EU Chamber of Commerce
- **SubGroup Chair**, WG5 Clinical Investigation, Asia Harmonization Working Party 5.
- **Coordinator** of Training & Research Network
- **Analyst**, Marketing & Clinical Research
- **Manager**, Regulatory Affairs & Clinical Research

Medical doctor with extensive domestic China and international leadership in quality systems, regulatory and government affairs for medical devices and diagnostics, health research and policy, epidemiology and clinical research.
A rare combination of business and technical skills, with deep understanding of Chinese, European and American healthcare systems and corporate cultures.
